

Sustainability

Your city, our commitment

Uber strives to be a zero-emission and low-packaging-waste platform by 2040.

[Read our commitment](#)

Millions of trips a day, zero emissions and a shift to sustainable packaging

That's our commitment to every person on the planet, and we'll do everything in our power to get there. The path will be electric and shared. It will be with buses, trains, bicycles, and scooters. It will mean helping people move, order meals, and send things using options that are more sustainable. These changes won't come easily, and they will take work and time to achieve. But we have a plan to get there, and we want you to come along for the ride.

- 2020**
Announced global commitment to becoming a zero-emission mobility platform.
- 2023**
Expanded global commitment to include zero-emission delivery trips and promote the transition to more-sustainable packaging options.
- 2025**
Hundreds of thousands of drivers transition to electric vehicles (EVs) through our Green Future program, with 50% of kilometers in EVs in key European cities.
80% of restaurant orders with Uber Eats across European and Asia Pacific cities are transitioned from single-use plastics to reusable, recyclable, or compostable packaging options.
- 2030**
Uber is operating as a zero-emission mobility platform in the US, Canada, and European cities.
100% of Uber Eats restaurant merchants transition to reusable, recyclable, or compostable packaging options globally.
- 2040**
100% of rides and deliveries globally are in zero-emission vehicles or through micromobility or public transit.

Offering more ways to ride green

We're committed to providing sustainable, shared alternatives to the personal car.

Uber Comfort Electric

Check out our newest way for you to be part of the climate solution—and do it in style. It's as simple as tapping a button and getting a ride in a premium EV. Uber Comfort Electric is now available in over 40 major cities across the US and Canada

1/4

Helping drivers go electric

Drivers are leading the way toward a greener future, and Uber is committed to supporting them. Our Green Future program provides access to resources valued at \$800 million to help hundreds of thousands of drivers transition to battery EVs by 2025 in Canada, Europe, and the US.

Helping merchants access more sustainable packaging

To address single-use-plastic waste and its effects on the environment, we're committed to supporting restaurant merchants' transition to recyclable, compostable, and reusable packaging. We'll help merchants with this transition in every city where we do business through a combination of discounts, incentives, and advocacy—with the goal of ending all unnecessary plastic waste from Uber Eats restaurant deliveries by 2030 and eliminating emissions on deliveries by 2040.

Partnering to fight climate change

Uber is bringing our innovation, technology, and talent to the fight against climate change. We're partnering with NGOs, advocacy groups, and environmental justice organizations to help expedite a clean and equitable energy transition. We're teaming up with experts, vehicle manufacturers, charging network providers, EV and e-bike rental fleets, and utility companies to help drivers gain affordable access to green vehicles and charging infrastructure. We're also working with suppliers of recyclable, reusable, and compostable packaging to enable restaurant merchants to access quality packaging at reduced prices.

Making transparency a priority

Progress starts with taking a serious look at where we stand today and sharing results to drive accountability.

ESG Report

Uber's Environmental, Social, and Governance Report shows how, through core business and social impact activities, we help make real life easier to navigate for everyone.

Climate Assessment and Performance Report

Our Climate Assessment and Performance Report analyzes billions of rides taken on our platform in the US, Canada, and major markets in Europe. Uber was the first—and one of the only—mobility companies to assess and publish impact metrics based on drivers' and riders' real-world use of our products.

Sparking electrification in Europe

Uber is accelerating its commitment to sustainability in Europe and around the world. Our SPARK report details Uber's approach and how we hope to partner with carmakers, charging companies, and policymakers to realize our goals.

Science Based Targets initiative

Uber joined the Science Based Targets initiative (SBTi) to help ensure accountability and rigor in our push to become a zero-emission platform. The SBTi defines best practices in target setting and independently assesses and approves progress.
